

## How to connect to UR\_RC\_InternalSecure from Mac OS X

Select the Airport icon (found in the top-right of your screen).

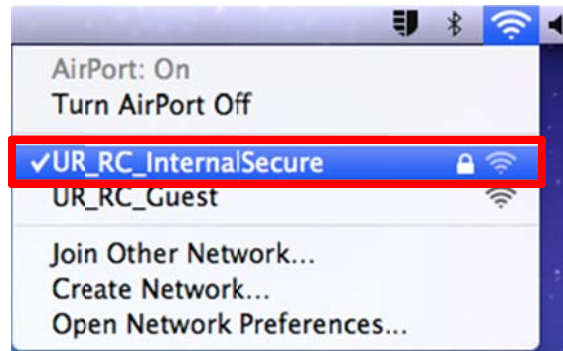

Click on the **UR\_RC\_InternalSecure** network to connect.

You will be asked to enter a Security key. Enter **URWireless** and click **OK**.

If you click on the Airport icon again, you will see that you have now been connected to the UR\_RC\_InternalSecure network (shown with a **Checkmark** next to it).

Open a web browser - you will be redirected to the URWireless Acceptable Use Policy. Enter your NetID and password on the left and then click Login.
